Institution of Occupational
Safety and Health

About the course

This course aims to provide delegates with understanding of their responsibilities when handling hazardous substances. Hazardous substances account for around 650,000 deaths every year, it is vital that any employee who works with chemicals (even household chemicals like bleach) have an understanding of their responsibilities under COSHH Regulations and how to reduce the chances of an incident occurring.

Available in over 35 languages

Our courses are machine translated* into a variety of popular International languages, so regardless of location or language preference, we've got you covered. Our machine translated content includes the translation of course transcripts and test questions.

*Content which is not English may be machine translated and is for assistive purposes only. We cannot guarantee the accuracy of translations.

Who should attend

This training course is designed with all levels of delegates in mind and covers all the information necessary to keep the delegate and their colleagues safe from substances that may be potentially harmful to their health.

Course syllabus

The course modules cover:

- Hazardous Substances, coming into contact with them and the effects of exposure
- Hazard Symbols
- 6 Simple Steps.

Certification

Delegates will receive a HSS printable certificate in COSHH upon completion of the course.

This course is approved and accredited by IOSH, Skills for Care.
