

# Ladder Safety

## E-Learning

This E-Learning course provides training on what to do prior and during use of a ladder.

**25** minutes

Online Learning

Institution of Occupational  
Safety and Health

### About the course

This online training aims to help organisations work towards compliance with the Work at Height Regulations 2005 by teaching delegates to understand the things they need to do before they use a ladder, as well as during use.

Available in 35 languages. Machine translated\* content is included and includes navigation, transcripts and test questions.

\*Content which is not English may be machine translated and is for assistive purposes only. We cannot guarantee the accuracy of translations.

### Who should attend

This course is suitable for delegates who use ladders within their workplace. In the UK, ladders account for roughly 40% of accidents that are a result of falling from height. Evidently, employers need to provide their staff with the knowledge on how to safely use a ladder, as well as how to conduct a precheck before using a ladder. This, in turn, will help organisations to reduce the risk of a fall from height occurring.

### Course syllabus

The course modules cover:

- Ladder Selection
- Ladder Pre-Check
- Ladder Setup
- Ladder Use.

### Certification

Delegates will receive a HSS printable certificate in Ladder Safety upon completion of the course. This course is approved and accredited by IOSH.
