

Why choose St John Ambulance?

St John Ambulance has years of experience and expertise in the field of first aid and is a name you can trust.

Our training resources reflect the latest medical thinking and best practice, incorporating real-life first aid scenarios drawn from the experiences of our 45,000 community-based volunteers.

St John Ambulance is the UK's third largest youth organisation, with half of our volunteers under the age of 25. We have experience of providing many different 'learning skills' programmes for young people and are in touch with learning and personal development needs.

Young first aider

first aid, first action

First aid training package
for 7 to 16-year-olds

In an emergency situation the first aider is the first to take action.

It's a fact that first aid saves lives. But learning first aid can benefit people in other ways too, and it's never too early to start!

The Young first aider package is a dynamic and exciting way for 7 to 16-year-olds to learn a life saving skill. First aid is a very real way for young people to contribute to their community and develop confidence and self-esteem. And, as part of Key Stage 2 and 3 Personal Social and Health Education (PSHE) and Key Stage 3 Citizenship curricula, it will help you towards Healthy Schools status through achieving the outcomes of Every Child Matters.

Whether you're planning to use this package in a school or a youth organisation, you can pick and choose from a selection of topics to build a course that fits around your teaching calendar.

Call **020 7278 7888** or visit www.stjohnsupplies.co.uk to order your Young first aider training package.

What you'll get with the Young first aider package.

The package has been created to encourage and support young people from a range of ages and abilities to develop first aid skills. It comes with a flexible set of resources that you can select from to suit your class or group. These include:

- 25 lesson plans covering learning objectives and outcomes for 25 first aid topics and differentiated worksheets
- 20 scenario cards showing various injuries
- 20 case study cards covering a variety of first aid situations
- CD-ROM with PowerPoint® presentation to support each topic (including embedded film clips and an audio clip of an emergency call) and PDFs for all worksheets and lesson plans
- DVD with clips of young people dealing with emergencies and demonstrating first aid treatments
- A set of A2 posters showing first aid situations and techniques
- 20 Young first aider certificates
- A set of student notes.

The Young first aider pack is only £59+VAT+p&p. To order yours today, so you can start teaching first aid skills immediately, call **020 7278 7888** or visit www.stjohnsupplies.co.uk
