

Spill Kits Chemicals and Oils

E-Learning

Training in how to handle spills of chemicals and oils using spill kits.

20 minutes

Online Learning

Institution of Occupational
Safety and Health

About the course

The course aims to ensure delegates are working towards compliance with The Control of Substances Hazardous to Health Regulations (COSHH) 2002, and that they understand the purpose of spill kits as well as how they can prevent a spill from spreading further.

Available in over 35 languages

Our courses are machine translated* into a variety of popular International languages, so regardless of location or language preference, we've got you covered. Our machine translated content includes the translation of course transcripts and test questions.

*Content which is not English may be machine translated and is for assistive purposes only. We cannot guarantee the accuracy of translations.

Who should attend

This course is suitable for delegates who need an awareness of how to handle spill kits with chemicals and oils. This online training aims to teach delegates the best practices surrounding the handling of a chemical or oil spill. Additionally, it looks into the dangers associated with the spillages.

Course syllabus

The course modules cover:

- Spill kits
- Spill response procedure.

Certification

Delegates will receive a HSS printable certificate in Spill Kits - Chemicals and Oils upon completion of the course.

This course is approved and accredited by IOSH, Skills for Care.
